SIMATS ENGINEERING

Saveetha Institute of Medical and Technical Sciences
Chennai- 602105

Engineer to Excel

Student Name: S.Karnesh **Reg. No.: 192421200**

Course Code: **ITA0440** **Slot: C**

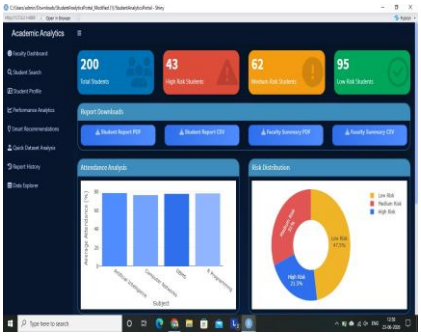

Course Name: **Statistics with R Programming for Business Analytics**

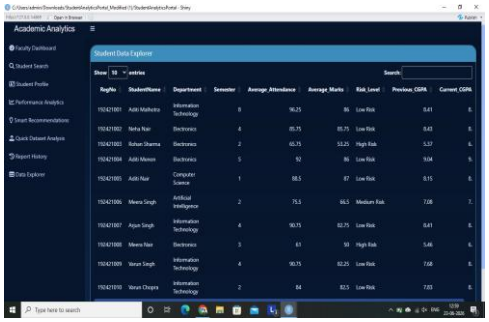

Course Faculty: Dr. Salini.S

Project Title: Student Performance Prediction and Academic Analytics

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

Project Description: **Module 2: Data Preprocessing and Feature Engineering**

This module focuses on preparing the student dataset for analysis and prediction. The data is cleaned by handling missing, duplicate, and incorrect values to improve quality. Relevant features such as attendance, marks, and study hours are selected and transformed into a suitable format for machine learning models. Exploratory analysis is performed to identify patterns and trends in student performance. The processed dataset is then used to build accurate student performance prediction models.
